

Prontosan[®] Debridement Pad

SOFT MECHANICAL REMOVAL OF SLOUGH AND DEBRIS

Experts in Wound Cleansing

A NEW ADDITION TO COMPLETE THE PRONTOSAN® RANGE

Designed for soft mechanical debridement of slough and debris. The Prontosan® Debridement Pad removes and binds slough and debris and assists with effective wound bed preparation - new granulation tissue is left intact.

FEATURES

- Good cleansing and debridement due to microfiber technology
- Soft debridement, no tissue irritation
- Unique droplet shape to allow debridement of cavities and areas difficult to reach
- Blister packaging to allow safe and aseptic soaking of the pad prior to use
- Produces good results even with scaly and necrotic coatings, if they are subject to prior autolytic treatment

INNOVATIVE SHAPE - DESIGNED FOR SUCCESS

Micro Technology, Maximum Cleansing

The Prontosan® Debridement Pad uses the latest technology in cleansing - microfibres. Microfibres are very small and utilise 'electrostatic forces' to attract even the smallest particles to them.

Each microfibre has a multiple strand structure, allowing for many more particles of slough and debris to be **removed** from the wound bed and **bound** to each microfibre within the pad; not just brushed away as with traditional, much larger, monofilament fibres.

There are **millions of microfibres** in each Prontosan® Debridement Pad for magnified debridement power.

BEFORE AND AFTER USING THE PRONTOSAN® DEBRIDEMENT PAD

Before debridement

After a single debridement

3 weeks post debridement

HOW TO USE FOR BEST RESULTS

- 1 Open the packaging, using the integrated tray to moisten (with Prontosan Solution*), covering the microfibre side of the pad
 - 2 Applying light pressure, use circular or sweeping motions over areas of slough and debris
 - 3 Irrigate (with Prontosan Solution*) to cleanse
 - 4 Apply Prontosan Gel X to help prevent biofilm formation and apply dressings as appropriate**
- TIP**
- B. Braun branded side faces away from the wound bed
 - No need to remove emollient prior to use
 - Prontosan® Solution (as soak or rinse) can be used beforehand

Before use of Prontosan® Debridement Pad

After use of Prontosan® Debridement Pad
