Surecan[®] Safety II

Power-injectable safety needles for Access Ports

Surecan® Safety II needles for Access Ports

Surecan® Safety II is a non-coring safety needle with a small size and unique design.

The Surecan® Safety II guarantees easy handling and maximal safety to minimize needlestick injuries. This ensures a high comfort for clinicians and patients, in hospitals as well as for home care treatment.

Indicated for up to seven days for:

- Infusion of chemotherapy
- Total parenteral nutrition (TPN)
- Antibiotic therapy
- Transfusion
- Pain relief and drainage
- Blood sampling
- Power injections of contrast media up to 325 psi

Ergonomic low profile wings

- Provide secure handling during puncture and removal
- Permit small and comfortable dressing
- Needle gauge indicated on wings

Closed-cell pad

- Increases patient comfort

Special needle tip

- Aids needle retention in the septum during power injections

Unique bevel

- Non-coring bevel designed to minimize septum damage

Coloured clamp

- Possible interruption of infusion at any time
- Easy to identify gauge of the needle
- Contains maximum psi information for high pressure injections

Extension tubing

- Transparent anti-kink tubing
- Power injectable

Extensive choice of references:

19 G to 22 G

12 mm to 38 mm

Surecan® Safety II, compatible with all B. Braun Access Port Systems

Surecan® Safety II allows hospitals to reply to the requirements of the European Council Directive 2010/32/EU from 10th May 2010: "Prevention from sharp injuries"

- "Health and safety of workers is paramount and is closely linked to the health of patients."*
- Surecan Safety II is a "medical (device) ... incorporating safety-engineered protection mechanisms."*

* European council directive 2010/32/EU from 10th May 2010

Green point and "click" confirms safety mechanism

- Easy confirmation of correct deployment
- Double affirmation through visual and audible feature

Transparent base

- Easier visualisation of the insertion point
- Holes aid skin aeration

Clip to base

- Risk reduction of separation or accidental detachment

Safe removal

- Stabilise the base of the needle
- Firmly pull the wings up until you hear a „click“ and see the green point

For more information on the risks and prevention of needle-stick injuries, please visit www.safeinfusiontherapy.com and refer to our brochure no. 6069095.

Caresite® as pre-connected needle-free valve

The Surecan® Safety II is also available with the pre-connected needle-free valve Caresite®. The split septum valve technology combined with the ergonomic design enables clear and easy access for improved patient care.

- Protects against microbiological contamination
- Prevents catheter occlusion through positive displacement (valve design)
- Ease of use

ATTENTION

High pressure (HP) injections have to be performed through the Caresite® valve
