### The difference is the detail

AESCULAP® was a pioneer in the introduction of non-sterile batteries. This avoids sterilization not only of the temperature sensitive battery cells, but also of the equally vulnerable integrated control electronics. This, in turn, has a positive effect on the service life of the batteries and, therefore, on the system's operating costs. A concept that has been proven for years now. The opportunity to replace the battery at a fixed price and the further use of the electronics and housing helps to preserve the environment as well as to deliver financial benefits.

### Mechanical processing

Thanks to the titanium housing and the ECCOS® storage solution Acculan 4 is suitable for mechanical cleaning, even with alkaline cleaning media.

### Service label

Regular servicing and preventive maintenance is essential to ensure the reliability of motor systems over a long service life. The service label on each Acculan 4 machine clearly shows when the next preventive maintenance is due.

Acculan 4 straight sternum saw

- Accessories, such as the ECCOS® storage solution, can be found in the [⇒ Power Systems main catalog O84002](#).
- The tools can be found in the [⇒ Burrs & Blades catalog O17599](#).

# Acculan 4

\* Usability validation tests for the different Acculan 4 products and applied parts. Probandes with different clinical experience confirmed safe handling. User needs such as 1) Reliability; 2) Longevity and 3) Ergonomics were also approved by the probands with the different Acculan 4 products and applied parts.
